

## **WinnCare Nordic leverer tre ErgoTrainer til nyt rehabiliteringscenter i Beijing**

**Af Lisbet Nielsen, 9. januar 2019**

I går, d. 8. januar 2019, åbnede kinesiske Sino-Fortune sit nybyggede rehabiliteringscenter øst for hovedstaden Beijing. Sino-Fortune kalder det nye rehabiliteringskoncept for "Sino-Denmark Rehabilitation Medicine". Netop den danske rehabiliteringstankegang har Sino-Fortune været meget interesseret i, og derfor besøgte de i foråret 2018 flere danske rehabiliteringstilbud med henblik på et samarbejde. Valget faldt på Center for Hjerneskade, som har været med til at udvikle WinnCare Nordics ErgoTrainer.

I går blev snoren klippet til centret, som bl.a. er udstyret med tre af WinnCare Nordics vægtaflastningssystemer (ErgoTrainer) og en Luna loftlift i et cirkulært skinnesystem, som bl.a. skal bruges til gangtræning.

Vi glæder os meget til fortsat at følge projektet og vil gøre vores til at bidrage til, at det bliver en succes.

## **WinnCare Nordic supplies rehabilitation center in Beijing with three ErgoTrainers**

**By Lisbet Nielsen, January 9th 2019**

Yesterday (January 8 2019), Chinese Sino-Fortune opened their newly built rehabilitation center east of Beijing, called "Sino-Denmark Rehabilitation Medicine". Sino\_Fortune have been very interested in the Danish rehabilitation model and therefore, in the spring of 2018, they visited a number of rehabilitation centers in Denmark. During their visit, they became especially interested in Copenhagen-based Center for Rehabilitation of Brain Injury, who have also helped develop WinnCare Nordic's ErgoTrainer.

Sino-Fortune and Center for Rehabilitation of Brain Injury initiated a collaboration and yesterday, the opening ceremony of the Chinese center took place. The center features three of WinnCare Nordic's weight relief systems (ErgoTrainer) and a circular track and a Luna ceiling hoist for gait training.

We look forward to following the project and will do our uppermost to contribute to making it a succes.
